Please use @mui/styles/createStyles	File Name: 1848-d47b235c21235173.js Line Number: 1	Appears on every webpage load	ERR-003	Console Warning	Invalid companyCreatedAt, using fallback: last 12 months	File Name: dashboard-ccec1f21f7035a87.js Line Number: 1	Appears on every webpage load	ERR-004	Console Warning	MUI: The Rating component was moved from the lab to the core. You should use `import { Rating } from '@mui/material'` or `import Rating from '@mui/material/Rating'`	File Name: 1900-d704c4b7b3a37308.js Line Number: 1	Appears on every webpage load	ERR-005	Console Error	Content Security Policy of your site blocks the use of 'eval' in JavaScript`	Link: https://challenges.cloudflare.com/cdn-cgi/challenge-platform/h/g/turnstile/f/ov2/av0/rch/olcpo/0x4AAAAAABkcqcG383GFedYc/light/fbE/new/normal?lang=auto	Appears on every webpage load	
Prioritisation Recommendations for Company Admin

P1 - CRITICAL: Fix now (security / runtime error)
P2 - HIGH: Fix soon (data integrity)
P3 - LOW: Fix in next cleanup (deprecation warnings)

P1 - CRITICAL

ERR-005

CSP blocks eval() — Cloudflare Turnstile

The Content Security Policy is actively blocking a script from running, likely breaking the bot-challenge/CAPTCHA flow. This is a console *error*, not a warning, which means something is silently failing for end users.

P2 — HIGH

ERR-001
ERR-003

Invalid companyCreatedAt — silent data fallback

The app cannot parse companyCreatedAt and is silently falling back to "last 12 months".

P3 — LOW

ERR-002

Deprecated: createStyles from @mui/material/styles

Using the deprecated import path. No user-visible impact today, but will break on a future MUI major version upgrade.

ERR-004

MUI Rating component — moved from lab to core

The Rating component is being imported from its old lab location. No user-visible impact, but carries the same future-breakage risk as ERR-002.
